In Focus: Smart Lighting in the HDB BRI-SGBC Joint Seminar: Creating Smart & Green Homes

Singapore, 10 October 2019 — During the opening address at the HDB BRI-SGBC Joint Seminar: Creating Smart & Green Homes, SGBC President Dr Ho Nyok Yong emphasised the synergistic connection between smart and green homes: *"While smart homes can help to enhance liveability, we must also pay attention to the more intangible aspects of green homes: indoor air quality, lighting as well as thermal and acoustic comfort."*

The 2019 edition of one of SGBC's longest-running seminar series took a smart approach - both literally and metaphorically - to the design, construction and operation of our housing estates. With speakers who are domain experts and industry practitioners from the likes of HDB, Frost & Sullivan, EM Services, ST Engineering and Microsoft, participants got insights on creating greener and smarter homes.
